SCHOOL DISTRICT 57
Student Guidelines for AI Use

STUDENT ELIGIBILITY

The use of school-approved AI tools is permitted for students in Grade 8 and above. This is to ensure students have the digital responsibility needed to be safe and use AI tools effectively.

PROTECT YOUR PRIVACY

Use only school-approved platforms that protect your data. Never share your full name, address, password, or any personal information with AI tools.

KEEP IT HUMAN

AI can be a powerful tool, but it should never replace your thinking, creativity, or voice. Use it to help generate ideas or expand your understanding, but make sure the work you hand in is truly your own.

FOCUS ON LEARNING

Use AI to support your learning - not to avoid it. Ask questions, explore topics, and think critically about what AI tells you. AI can make learning exciting but it's your effort that makes it meaningful.

THINK CRITICALLY

AI tools don't always get it right. They can make mistakes or reflect unfair assumptions. Always double-check facts, and if something seems biased or wrong, check with your teacher.

USE AI RESPECTFULLY

Always use AI in ways that are kind, fair, and respectful. Don't use it to create hurtful content, spread misinformation, or target anyone. Your digital choices reflect your values, make them count.

BE HONEST

If you use AI to help with an assignment, be clear about how you used it. Follow your teacher's expectations on when it is OK to use AI and always give credit when it's required.
