

University of Northern British Columbia Dual Credit Initiative

Winter 2022 Semester Course Choices

The following list is a summary of courses available for registration by UNBC Dual Credit students. All students are encouraged to access the UNBC Undergraduate Academic Calendar prior to registration to ensure they have met required prerequisites and are aware of course preclusions and other necessary course information. UNBC Student Advisors are available to help you. The Winter semester begins January 5 and ends April 22. The deadline to add or drop a course is January 19, and the deadline to withdrawal is February 24.

UNBC Course Schedule: <http://www.unbc.ca/current-students>

UNBC Course Descriptions: <https://www2.unbc.ca/calendar/undergraduate/course-descriptions>

NOTE: Even after the schedule is open for registration, course section dates and times listed within this document are subject to change. It is *strongly recommended* that students verify when their desired course(s) are offered using the live Course Schedule tool, linked above.

ANTH 102-3 A World of Discovery

Using a thematic approach, this course explores what defines the human species. Some of the themes explored may include human evolution and our primate biological kin; archaeology and digging for the past; culture in a global world; communication or the essentials of being a talking and increasingly texting primate; health as social and biological; production and consumption, from the first stone tools to the Big Mac; and other topics that deal with humanity past and contemporary.

Schedule: Tuesday & Thursday 8:30 am - 9:50 am

Instructor: Tara Lynn Joly

Location: 7-150

ASTR 120-3 Introduction to Astronomy I: The Solar System

This is a one-semester introductory course in Astronomy that is general enough to be of interest to science and non-science majors with a proper background in mathematics. This course is complementary to ASTR 121-3. Topics include: an overview of our solar system; the Sun; Earth and the Moon; the inner planets: Mercury, Venus, and Mars; the gas giants: Jupiter, Saturn, Uranus, and Neptune; moons and ring structure of the gas giants; Pluto and Charon; asteroids, comets, meteors, and meteorites; the origin and evolution of our solar system; the origin and evolution of the sun; other solar systems and exoplanets. ASTR 120 and ASTR 121 may be taken in either order.

Prerequisite: Foundations of Math 11 or Principles of Math 11 or Precalculus 11 or Principles of Math 12 (50% or Better)

Prerequisite course must be completed prior to the beginning of dual credit course.

Schedule: Monday, Wednesday, Friday 10:30 am - 11:20 am

Instructor: Bridget Meghan Costello

Location: 7-158

BIOL 104-3 Introductory Biology II

This lecture-based course is a survey of living organisms, plant and animal form and function, ecology and population biology.

Prerequisite: Biology 11 or Life Sciences 11 or Biology 12 or Anatomy & Physiology 12 (50% min. for any of these courses) or BIOL 101 or 103 (minimum grade of D-)

Prerequisite course must be completed prior to the beginning of dual credit course.

Schedule: Monday, Wednesday, Friday 10:30 am - 11:20 am

OR Monday, Wednesday, Friday 11:30 am - 12:20 pm

Instructor: TBA

Location: 6-213 or 7-238

Note: Students may register in the corresponding BIOL 124-1 lab; however, it is not required. Numerous 3-hour lab sections available.

BIOL 110-1 Introductory Ecology

This course is designed to introduce non-science majors to ecological systems. Principles of ecology, biotic and abiotic conditions, population, community and ecosystem structure, human impacts on these systems, and basic concepts of conservation and preservation of ecosystems.

Schedule: Monday, Wednesday, Friday 4:30 pm - 5:20 pm

Instructor: TBA

Location: 8-164

BIOL 124-1 Introductory Biology Laboratory

This laboratory-based course introduces students to plant and animal diversity, form and function and ecological relationships among organisms, closely following the lecture organization in BIOL 104-3. Students normally take this course concurrently with BIOL 104-3 as the lab component complements the lecture, but should check the relevant program requirements to see if the lab is required. (Note: not all programs require both the lecture and lab components.)

Schedule: Numerous 3-Hour Lab Sections Available

Instructor: TBA

Location: 8-322

CHEM 100-3 General Chemistry I

The first course in a two-course lecture-based sequence of chemistry courses emphasizing the basic principles of chemistry. Topics include: classification of matter, periodic properties of elements, atomic and molecular structure, stoichiometry, chemical reactions, thermochemistry, chemical bonding and an introduction to organic chemistry. Students requiring the first year laboratory courses in their program of study are encouraged to enrol in CHEM 120-1 concurrently.

Prerequisite: MATH 115 Minimum Grade of D- or PreCalculus 12 (50%) or Principles of Math 12 (50%)

Prerequisite course must be completed prior to the beginning of dual credit course.

Schedule: Monday, Wednesday, Friday 10:30 am – 11:20 am

Instructor: TBA

Location: 5-176

Note: While there is a laboratory section for this lecture (CHEM 120-1) it is not offered in the Winter semester.

CHEM 101-3 General Chemistry II

The second course in a two-course lecture-based sequence of chemistry courses emphasizing the basic principles of chemistry. Topics include: intermolecular forces, properties of solutions, reaction kinetics, chemical equilibrium, acids and bases, applications of aqueous equilibria, entropy and free energy, and electrochemistry. Students requiring the first year laboratory courses in their program of study are encouraged to enrol in CHEM 121-1 concurrently.

Prerequisite: CHEM 100 Minimum Grade of D- and MATH 115 Minimum Grade of D- or PreCalculus 12 (50%) or Principles of Math 12 (50%)

Prerequisite course must be completed prior to the beginning of dual credit course.

Schedule: Monday, Wednesday, Friday 10:30 am – 11:20 am

OR Monday, Wednesday, Friday 11:30 am – 12:20 pm

Instructor: Umesh Parshotam

Location: 7-238 or 6-213

Note: Students may register in the corresponding CHEM 121-1 lab; however, it is not required. Numerous 3-hour lab sections available.

CHEM 121-1 General Chemistry Laboratory II

A laboratory half-course designed to accompany CHEM 101-3 and introduce basic chemistry laboratory procedures. Experiments will be performed which complement the material presented in CHEM 101-3.

Schedule: Numerous 3-Hour Lab Sections Available

Instructor: Umesh Parshotam, TBA

Location: 8-421

COMM 100-3 Introduction to Canadian Business

This course is an overview of the Canadian business environment, forms of organizations, the management function, and an introduction to the functional areas of business management. The course includes the challenges and opportunities facing small business.

Schedule: Wednesday 6:00 pm - 8:50 pm

Instructor: L. Charles Scott

Location: 7-212

OR

Schedule: Tuesday, Thursday 8:30 am - 9:50 am

Instructor: Julius Bankole

Location: 8-166

CPSC 110-3 Introduction to Computer Systems and Programming I

The course provides an introduction to computer systems and programming, concepts in computer architecture including the central processing unit, buses, memory units, input/output and communication devices. The introduction to operating systems emphasizes the file system and program development utilities. Programming concepts and techniques include problem analysis, program design, coding, and testing, as well as language elements such as data types, variables and assignment statements, expressions, mixed-mode arithmetic, input/output operations, basic data structures and control structures, procedures and abstract data types. Basic database management concepts will also be introduced. Students will develop small applications programs. CPSC 110-3 is a first course in computer science and computer programming. CPSC 110-3 cannot be counted as a computer science course by computer science majors. Credit will not be awarded for both CPSC 110-3 & CPSC 100-4. Refer to major for required course.

Please note: You must register separately in lecture, lab, and tutorial components.

Prerequisite: MATH 115 Minimum Grade of C- or PreCalculus 12 (50%) or Principles of Math 12 (50%) or Foundations of Math 12 (50%)

Prerequisite course must be completed prior to the beginning of dual credit course.

Schedule: Monday, Wednesday, Friday 8:30 am - 9:20 am

Instructor: Fan Jiang

Location: 7-158

CPSC 110-3 Introduction to Computer Systems and Programming Laboratory I

The course provides an introduction to computer systems and programming, concepts in computer architecture including the central processing unit, buses, memory units, input/output and communication devices. The introduction to operating systems emphasizes the file system and program development utilities. Programming concepts and techniques include problem analysis, program design, coding, and testing, as well as language elements such as data types, variables and assignment statements, expressions, mixed-mode arithmetic, input/output operations, basic data structures and control structures, procedures and abstract data types. Basic database management concepts will also be introduced. Students will develop small applications programs. CPSC 110-3 is a first course in computer science and computer programming. CPSC 110-3 cannot be counted as a computer science course by computer science majors. Credit will not be awarded for both CPSC 110-3 & CPSC 100-4. Refer to major for required course.

Schedule: Numerous 1.5-Hour Lab Sections Available

Instructor: TBA

Location: 8-457

CPSC 110-3 Introduction to Computer Systems and Programming Tutorial I

The course provides an introduction to computer systems and programming, concepts in computer architecture including the central processing unit, buses, memory units, input/output and communication devices. The introduction to operating systems emphasizes the file system and program development utilities. Programming concepts and techniques include problem analysis, program design, coding, and testing, as well as language elements such as data types, variables and assignment statements, expressions, mixed-mode arithmetic, input/output operations, basic data structures and control structures, procedures and abstract data types. Basic database management concepts will also be introduced. Students will develop small applications programs. CPSC 110-3 is a first course in computer science and computer programming. CPSC 110-3 cannot be counted as a computer science course by computer science majors. Credit will not be awarded for both CPSC 110-3 & CPSC 100-4. Refer to major for required course.

Schedule: Numerous 1.5-Hour Tutorial Sections Available

Instructor: TBA

Location: 5-178

CPSC 141-3 Discrete Computation Math I

This course provides an introduction to set theory, elements of combinatorics and probability theory, logical and formal reasoning using predicate and propositional calculus, together with narrative proof techniques. Other topics include well-ordered sets, recursive definitions and mathematical induction; introductory number theory including the division algorithm, Euclidean algorithm, prime numbers and the fundamental theorem of arithmetic; properties of functions and relations including bijections, projections, inverses, composition, and Cartesian products.

Prerequisite: Principles of Math 12 or Precalculus 12 (50% or Better)

Prerequisite course must be completed prior to the beginning of dual credit course.

Schedule: Monday, Wednesday, Friday 11:30 am - 12:20 pm
Instructor: Liang Chen
Location: 7-150

ECON 100-3 Microeconomics

The interactions of households, firms and government policies. An analysis of how different economic agents interact to determine what is produced, how it is produced and to whom it is distributed.

Schedule: Wednesday, Friday 11:30 am - 12:50 am
Instructor: Karima Fredj
Location: 7-212

ECON 101-3 Macroeconomics

The determinants of unemployment, inflation and growth focusing on Canada's macroeconomics performance.

Schedule: Tuesday, Thursday 11:30 am - 12:50 pm
Instructor: TBA
Location: 8-164

ENGL 100-3 Intro to Literary Structures

This course provides an introduction to the reading of the three major genres: poetry, fiction, and drama. The course introduces the students to the basic structural principles and rhetorical strategies of literary texts by observing structural and rhetorical theory applied to specific poems, fictions, and plays.

Schedule: Tuesday, Thursday 2:30 pm - 3:50 pm
Instructor: Monica Mattfeld
Location: TBA

OR

Schedule: Friday 6:00 PM – 8:50 PM
Instructor: Robert Budde
Location: 8-161

ENGL 103-3 Introduction to Fiction

This course provides an introduction to the reading of fiction through a detailed examination of a range of narrative texts (e.g., the novel, short fiction).

Schedule: Tuesday, Thursday 8:30 am - 9:50 pm
Instructor: Blanca Schorcht
Location: 5-173

ENGL 170-3 Writing and Communication Skills

Students will be taught how to construct an argument, and how to assemble and present an academic essay. There will be regular practice in writing well. The course includes library research and an oral presentation, and may also include computer skills.

Schedule: Monday, Wednesday, Friday 9:30 am - 10:20 am
Instructor: Fatemeh Namaei
Location: 5-171

OR

Schedule: Monday, Wednesday 8:30 am - 9:50 am
Instructor: TBA
Location: 5-176

OR

Schedule: Tuesday, Thursday 8:30am-9:50am
Instructor: Fatemeh Namaei
Location: 5-171

FNST 100-3 The Aboriginal Peoples of Canada

This course is an introduction to the languages, history, culture and enduring presence of the aboriginal people of Canada, intended to explore the range of aboriginal social formations, both past and present, and to consider the future. Oral, written, and archaeological records will be examined. Special attention will be given to the crucial economic, social, and spiritual contacts that exist within aboriginal societies, as well as to materials on the changes that have occurred since the advent of the Europeans.

Schedule: Monday 11:30 am - 2:20 pm
OR Wednesday, 2:30 pm - 5:20 pm
Instructor: Tannis Reynolds
Location: 5-158 or 5-173

GEOG 102-3 Earth from Above

This course explores the earth from above, through the eyes of satellites, aircraft, and drones. We have the unique ability to see our planet from different angles and perspectives. When viewed from above, patterns, processes, systems, and human/environmental change on the surface of the planet become highly visible. This course is delivered through lectures and in-class tutorials. Topics include: oceans, rivers, and lakes; landscapes, mountains, and snow and ice; forests and ecosystems; weather and climate; and urban and industrial activity.

Schedule: Monday, Wednesday 2:30 pm - 3:50 pm

Instructor: Joseph Shea

Location: 8-164

HHSC 101-3 Introduction to Health Sciences II: Rural and Aboriginal Issues

This course will provide an overview of individual and population health, health care systems, legislation, and the roles of the various health care professions in rural and aboriginal communities. Models of interdisciplinary cooperation, models of community health, and ethical issues are also covered.

Schedule: Tuesday, Thursday 4:00 pm - 5:20 pm

Instructor: Mamdouh Shubair

Location: 5-184

HHSC 105-3 Functional Anatomy

This introductory anatomy course provides a macroscopic examination of the human body. Lecture topics include musculoskeletal system and mobility, major organ systems including cardiovascular, digestive and neurological, with emphasis on how these systems integrate for body function. A laboratory component is included. This course is appropriate for students who intend to enter health profession fields.

Prerequisite: Biology 12 (50%) and Chemistry 11 (50%)

Prerequisite course must be completed prior to the beginning of dual credit course.

Schedule: Monday, Wednesday 8:30 am - 9:50 am

Instructor: TBA

Location: 5-184

HHSC 105-0 Functional Anatomy Laboratory

This introductory anatomy course provides a macroscopic examination of the human body. Lecture topics include musculoskeletal system and mobility, major organ systems including cardiovascular, digestive and neurological, with emphasis on how these systems integrate for body function. A laboratory component is included. This course is appropriate for students who intend to enter health profession fields.

Schedule: Numerous 1.5-Hour Lab Sections Available

Instructor: Meghana Adoor

Location: 8-226

HIST 191-3 World History since 1550

This course examines the history of the world from the mid-sixteenth century through the end of the twentieth. The global movement of people, ideas, and economic practices receives particular attention, as do processes of imperialism and colonialism. Students are also introduced to the discipline of History and to the skills of document analysis, historical writing, and primary source research.

Please note: You must register separately in lecture and lab components if applicable.

Schedule: Monday, Wednesday 12:30 pm - 1:20 pm

Instructor: TBA

Location: 8-164

NOTE: There is a tutorial requirement for this course (1 hour/week). Numerous choices available.

INTS 121-2 Beginning Japanese II

INTS 122-3 is a continuation of INTS 121-3. Students continue to develop their Japanese language skills in listening, speaking, reading, and writing. They are also given a deeper introduction to Japanese culture. This course is more grammar intensive than INTS 121-3, strengthening the foundations set up in that course. Sixty additional kanji are introduced (for a cumulative total of 120). This course is not open to native speakers. Students must achieve a minimum grade of C in INTS 121-3 or obtain permission of the instructor to continue. Permission of the instructor is also required for students who have completed Grade 11 Japanese, or who have prior knowledge of Japanese or who have at least one Japanese speaking parent.

Please note: You must register separately in lecture and lab components with the same instructor.

Prerequisite: INTS 121 Minimum Grade of C

Prerequisite course must be completed prior to the beginning of dual credit course.

Schedule: Tuesday, Thursday 11:30 am - 12:50 pm

Instructor: Ami Hagiwara

Location: 5-122

NOTE: There is a lab requirement for this course (1 hour/week). Numerous choices available.

INTS 172-3 Beginning French II

INTS 172 is a continuation of INTS 171. Communication abilities continue to be emphasized, along with application of grammatical rules in short compositions. Students acquire a deeper knowledge of the French culture. This course is not open to native speakers. Students must achieve a minimum grade of C in INTS 171, or obtain permission of instructor to continue. Permission of instructor is required for students who have completed grade 11 French, or some French immersion education.

Prerequisite: INTS 171 Minimum Grade of C

Prerequisite course must be completed prior to the beginning of dual credit course.

Schedule: Monday, Wednesday 6:00pm-7:20pm

Instructor: Gerald Chidiac

Location: 5-313

NOTE: There is a lab requirement for this course (1 hour/week). Numerous choices available.

INTS 182-3 Beginning Spanish II

INTS 182 is a continuation of INTS 181. This course introduces more complex grammatical structures, along with a broader vocabulary. Students also explore cultural aspects of the Spanish-speaking world. This course is not open to native speakers. Students must achieve a minimum grade of C in INTS 181, or obtain permission of instructor to continue. Permission of instructor is also required for students who have prior knowledge of Spanish.

Prerequisite: INTS 181 Minimum Grade of C

Prerequisite course must be completed prior to the beginning of dual credit course.

Schedule: Monday, Wednesday 10:00 am - 11:20 am

Instructor: Upasana Thakkar

Location: Online

NOTE: There is a lab requirement for this course (1 hour/week). Numerous choices available.

MATH 100-3 Calculus I

This course is an introduction to the calculus of one variable, primarily for majors and students in the sciences. Topics include functions of one variable; inverses; limits; continuity; the difference quotient and derivatives; rules for differentiation; differentiability; the mean value theorem; the differential; derivatives of trigonometric, logarithmic and exponential functions; l'Hôpital's rule; higher derivatives; extrema; curve sketching; Newton's method; antiderivatives; definite integrals; the fundamental theorem of calculus; integrals of elementary functions; area between curves; and applications of integration. Students use Maple software in this course.

Please note: You must register separately in lecture and lab components.

Prerequisite: Principles of Math 12 or PreCalculus 12 (67% or Better)

Prerequisite course must be completed prior to the beginning of dual credit course.

Schedule: Monday, Wednesday, Friday 1:30 pm - 2:20 pm

Instructor: Tak Shik Wan

Location: 7-150

NOTE: There is a lab requirement for this course (1.5 hour/week). Numerous choices available.

MATH 101-3 Calculus II

This course is a continuation of MATH 100-3. Areas of study include the definition of the natural logarithm as an integral and of the exponential function as its inverse, integration by parts, miscellaneous techniques of integration, improper integrals, volumes by slicing and by shell techniques, the trapezoidal rule and Simpson's rule, infinite sequences and series, Taylor series, masses, volumes, moments, centre of mass, first order linear differential equations, definition of partial derivatives. All sections of this course are taught using Maple software.

Prerequisite: MATH 100 or MATH 105 (Minimum Grade of C-)

Prerequisite course must be completed prior to the beginning of dual credit course.

Schedule: Monday, Wednesday, Friday 1:30 pm - 2:20 pm

Instructor: Mohammad El Smaily

Location: 7-238

NOTE: There is a lab requirement for this course (1 hour/week). Numerous choices available.

MATH 115-3 Precalculus

This course examines algebraic manipulation, solutions of algebraic equations, functions, inverses, graphing, and analytic geometry.

Prerequisite: PreCalculus 11 (60%) or Foundations of Math 12 (73%) or Principles of Math 11 (60%)

Prerequisite course must be completed prior to the beginning of dual credit course.

Precluded course: Students who have completed or will complete Pre-calculus 12 are unable to take this course without permission from the Chair of Mathematics.

Schedule: Monday, Wednesday, Friday 11:30 am - 12:20 pm

Instructor: Jean Bowen

Location: 10-5488

MATH 150-3 Finite Mathematics for Business and Economics

This course is offered primarily for students in the School of Business and the Economics Program. The course covers functions and graphs, linear systems of equations, matrix notation and properties, matrix inversion, linear programming, sets, counting and probability, and an introduction to actuarial mathematics.

Prerequisite: Minimum Grade of C- in UNBC MATH 115 or PreCalculus 12 (60%) or Principles of Math 12 (60%)

Prerequisite course must be completed prior to the beginning of dual credit course.

Schedule: Monday, Wednesday, Friday 1:30 pm - 2:20 pm
Instructor: Erin Beveridge
Location: 10-4588

MATH 152-3 Calculus for Non-majors

Limits, the derivative, techniques of differentiation, exponential functions and exponential growth, maxima and minima, curve sketching, first order linear differential equations, definite and indefinite integrals, partial derivatives, optimization of functions of several variables, Lagrange multipliers, with applications in the social and physical sciences. Applications may vary somewhat from section to section, depending on student's discipline. Not open to mathematics or computer science majors.

Prerequisite: Minimum Grade of C- in UNBC MATH 115 or PreCalculus 12 (60%) or Principles of Math 12 (60%)

Prerequisite course must be completed prior to the beginning of dual credit course.

Schedule: Monday, Wednesday, Friday 4:30 pm - 5:20 pm
Instructor: Brian Schaan
Location: 8-166

MATH 190-4 Math for Elementary Educators

This course develops an understanding of mathematical concepts and relationships used in the elementary school curriculum. The content focus is on numbers and number systems, patterns and relationships, shapes and space, and statistics and probability. Problem solving and deductive reasoning are stressed throughout the course. Students who have taken MATH 100, MATH 105, MATH 152 or equivalent require permission of the Chair.

Prerequisite: Foundations of Math 11 (60%) or PreCalculus 11 (60%)

Prerequisite course must be completed prior to the beginning of dual credit course.

Schedule: Tuesday, Thursday 4:30 pm - 5:50 pm
Instructor: Jean Bowen
Location: 10-4520

NOTE: There is a lab requirement for this course (1 hour/week) Fridays at 4:30 pm.

NRES 100-3 Communications in Natural Resources and Environmental Studies

This course will provide a basic understanding of human behavioural responses as well as develop learning skills in oral and written communications. Emphasis will be on determining the nature of an audience, accessing

appropriate material, report writing, oral presentation and literature relevant to natural resources and environmental disciplines.

Schedule: Tuesday, Thursday 10:00 am - 11:20 am
Instructor: TBA
Location: 5-177

OR

Schedule: Monday, Wednesday 8:30 am - 9:50 am
Instructor: Christopher Opio
Location: 5-184

NREM 101-3 Introduction to Natural Resources Management and Conservation

This course introduces past, present and future issues in natural resources management and conservation. Guest speakers share their professional experiences working in various fields of natural resources management. Students learn to think critically about the multidisciplinary nature of resource management and they provide solutions to complex, real-world problems.

Schedule: Tuesday, Thursday 1:00 pm - 2:20 pm
Instructor: Scott Green
Location: 8-164

PHYS 100-4 Introduction to Physics I

This course is the first part of an algebra-based introductory physics course sequence for majors in life and environmental sciences. Topics include physics and measurement, the laws of motion, applications of Newton's second law, work and energy, linear momentum and collisions, static equilibrium, elasticity, law of universal gravitation, laws of thermodynamics, fluid mechanics, and sound waves.

Prerequisite: Minimum Grade of D- or Physics 11 (50%) or Physics 12 (50%)

Prerequisite course must be completed prior to the beginning of dual credit course.

Schedule: Monday, Wednesday, Friday 5:30 pm - 6:20 pm
Instructor: Ian Hartley
Location: 8-164

NOTE: There is a lab requirement for this course (3 hours/week). Numerous choices available.

PHYS 101-4 Introduction to Physics II

Second part of an algebra-based introductory physics course for majors in life sciences. Covers: electric charge, electric field, electric potential, DC circuits, magnetic field, sources of magnetic fields, magnetic induction, electromagnetic waves, geometrical optics, elements of modern physics.

Prerequisite: PHYS 100 Minimum Grade of D- or PHYS 110 Minimum Grade of D-

Prerequisite course must be completed prior to the beginning of dual credit course.

Schedule: Monday, Wednesday, Friday 8:30 am - 9:20 am

Instructor: Jean-Sebastian Bernier

Location: 8-166

NOTE: There is a lab requirement for this course (3 hours/week). Numerous choices available.

POLS 100-3 Contemporary Political Issues

An introduction to the basic concepts of political science through an examination of contemporary political issues: local, provincial, national and international.

Schedule: Monday, Wednesday 10:00 am - 11:20 am

Instructor: Jason Lacharite

Location: 7-150

NOTE: There is a tutorial requirement for this course (1 hour/week). Numerous choices available.

PSYC 101-3 Introduction to Psychology I

This course explores the ways in which human beings think about and structure gender. Topics include ideologies of masculinity and femininity, gender and psychology, gendered language, the relationship between gender and sexuality, and gender in popular culture and media.

Schedule: Monday, Wednesday 1:00 pm - 2:20 pm

Instructor: Paul Siakaluk

Location: 6-213

PSYC 102-3 Introduction to Psychology II

This course provides a further introduction to the science of psychology. Topics may include the following: intelligence; human development; emotion and motivation; stress; coping; health; social psychology; personality; and psychological disorders and interventions.

Prerequisite: PSYC 101 Minimum Grade of D-

Prerequisite course must be completed prior to the beginning of dual credit course.

Schedule: Monday, Wednesday, Friday 8:30 am - 9:20 am
Instructor: Olga Prudnikova
Location: 6-213

WMST 103-3 Introduction to Gender Studies

This course explores the ways in which human beings think about and structure gender. Topics include ideologies of masculinity and femininity, gender and psychology, gendered language, the relationship between gender and sexuality, and gender in popular culture and media.

Schedule: Monday, Wednesday 11:30 am - 12:50 pm
Instructor: TBA
Location: 7-158
